TARINI AKULA

Salesforce Administrator / Developer
akulatarini@gmail.com | +1 (361) 265-8824 | LinkedIn | VA, USA

SUMMARY

Salesforce Administrator and Platform Developer I with 2+ years of U.S.-based CRM experience across public health, HR/recruiting, nonprofit, and partner portals. I build the Flows, Apex, and LWC that replace manual processes, connect Salesforce to outside systems, and keep releases stable across sandboxes. Most recently on a statewide disease-surveillance system for the State of Illinois.

EXPERIENCE

Accenture (Contract) | Salesforce Administrator / Developer Apr 2026 – Present | Remote, USA

State of Illinois, Integrated Disease Surveillance System

- Configured Health Cloud and Service Cloud for statewide disease case management, with custom objects, record types, and validation rules. Locked down access with profiles, permission sets, role hierarchy, sharing rules, and field-level security to meet data-governance requirements.
- Set up an Experience Cloud portal so outside labs and clinics could submit case reports securely.
- Built REST/SOAP integrations with Named Credentials and OAuth 2.0 to connect Salesforce with external lab reporting systems and a state system. Used custom metadata mappings to route questionnaire data downstream.
- Moved questionnaire data between systems using JSON import/export, with validation and cleansing before load.
- Wrote LWC components with Apex controllers where configuration alone couldn't do the job, and handled production issues with root-cause fixes instead of workarounds.
- Ran deployments through Dev, QA, UAT, and Production using SFDX, Git, and Azure DevOps, including regression and post-deployment smoke testing. Coached junior admins on Flow and reporting.

Environment: Health Cloud, Service Cloud, Experience Cloud, Flow, Apex, LWC, REST/SOAP, OAuth 2.0, SFDX, Git, Azure DevOps

Intellibee Inc (Contract) | Salesforce Administrator / Developer Apr 2025 – Apr 2026 | Michigan, USA

IntelliATS (applicant tracking)

- Built an applicant scoring model that ranks candidates automatically for recruiters: Required Skills 60%, Professional Summary 25%, Domain/Certifications 15%.
- Added OpenAI resume parsing that reads structured and semi-structured JSON to auto-fill applicant details, plus one-click bulk email to all matching candidates.
- Wrote a Record-Triggered Flow that removes an applicant when their last submission is deleted, which cut duplicate-data errors by 40%.

IntelliTIME (time tracking)

- Designed time tracking on custom objects and validation rules, reducing timesheet errors by 35%. Automated entry validation and approvals with Flows and Apex batch jobs, cutting approval turnaround by 40%.

IntelliHRM (HR onboarding)

- Automated candidate hiring steps with Record-Triggered and Screen Flows, improving recruiter efficiency by 25%. Built manager dashboards and list views for employee data.

Donor & Fundraising System (NPSP)

- Built LWC and Visualforce views for donor profiles, pledge history, and fundraising leaderboards shown on TV screens and external portals.
- Migrated 10,000+ donor records with Data Loader at 99% accuracy after Excel cleansing and deduplication. Automated recurring-pledge processing with Apex and Flows, reducing manual processing by 40%.

City of Boston, GJMBC

- Restored portal login after a vendor offboarding by tracing a hard-coded authentication issue through a GitHub codebase spanning an Azure/PHP frontend and the Salesforce backend. Handled user management and updated data fields for a 1,000+ record dataset.

Environment: Apex, Flow, LWC, Visualforce, NPSP, OpenAI API, Data Loader, Git, SFDX, Copado

Perficient Corp (Contract) | Salesforce Administrator Aug 2024 – Apr 2025 | NC, USA

Partner & Customer Experience Portal

- Built Experience Cloud sites for partners and customers with self-service access to cases, knowledge articles, and training material, using sharing rules so partners saw only their own accounts and opportunities.
- Automated new-user onboarding with Flows and email notifications, cutting manual account setup time by 40%. Built dashboards so leadership could track adoption and training needs.

Environment: Experience Cloud, Flow, Sharing Rules, Reports & Dashboards

Texas A&M University – Corpus Christi | Graduate Teaching and Research Assistant Jun 2023 – May 2024 | TX, USA

- Supported engineering labs and helped students debug embedded programs. Converted existing microcontroller programs to Embedded C on TI MSP430 hardware and tested them until they matched expected behavior.

IBM | Salesforce Developer Apr 2021 – May 2022 | Hyderabad, India

- Worked on a sales and order management system with ERP integration and order automation supporting 1,000+ daily transactions.
- Managed release cycles using Git, Salesforce CLI, and change sets, and took part in requirements gathering and UAT with cross-functional stakeholders.

SportsPlus Software Technologies | Salesforce Administrator Jul 2020 – Apr 2021 | Hyderabad, India

- Configured custom objects, record types, Dynamic Forms, and page layouts for 1,500+ registrations on a sports management platform covering match scheduling, recorded results, and which teams advanced to the next round.
- Built Flow approval automation that cut processing time by 50%.
- Set up role-based access (profiles, permission sets, OWD) for coaches, parents, and staff, and migrated data with Data Loader, improving accuracy by 20%.

SKILLS

Salesforce: Sales Cloud, Service Cloud, Health Cloud, Experience Cloud, NPSP, Omni-Channel
Development: Apex, Batch/Queueable Apex, LWC, Visualforce, SOQL/SOSL, Metadata API
Automation: Record-Triggered Flows, Screen Flows, Approval Processes, Validation Rules
Integration: REST, SOAP, OAuth 2.0, Named Credentials, OpenAI API, JSON
Data: Data Loader, Data Import Wizard, deduplication
DevOps: Git, SFDX, Azure DevOps, Copado, Change Sets
Other: SQL, Python, Java, JavaScript, Power BI, JIRA, Agile/Scrum

CERTIFICATIONS

Salesforce Certified Administrator (ADM-201) | Platform Developer I (PD1) | Copado Certified Fundamentals

EDUCATION

M.S. Computer Science, Texas A&M University – Corpus Christi May 2024
B.Tech Electronics & Communication Engineering, Malla Reddy College of Engineering and Technology Jul 2020
